PROFESSIONAL SUMMARY

Data-driven MIS and Reporting Analyst with 2.5+ years of professional experience in healthcare operations and Revenue Cycle Management. Currently pursuing MSc Applied Data Science & AI at SRH University, Germany. Proven ability to automate Excel reporting workflows, build KPI dashboards, and deliver actionable insights. Skilled in Python, Power BI, SQL, and Advanced Excel. Seeking a Werkstudent or IT Internship role in Data Analytics, Business Intelligence, or AI in the Nuremberg area.

TECHNICAL SKILLS

Languages: Python (Intermediate), SQL (Basics), VBA

Analytics & BI: Power BI, Advanced Excel (Pivot Tables, VBA, Dashboards), Tableau

Data Science: Pandas, NumPy, Machine Learning Fundamentals, Statistics, Hypothesis Testing

Databases: MySQL, PostgreSQL

Tools: Git, GitHub, Jupyter Notebook, VS Code, MS Office 365

Domain: Healthcare RCM, MIS Reporting, KPI Analysis, HIPAA, AR Management

PROFESSIONAL EXPERIENCE

Senior Executive – MIS & Business Intelligence | [ECLAT Health Solutions](#)
Apr 2025 – Oct 2025

- ▶ Produced 10+ weekly and monthly MIS reports covering revenue performance and AR pipeline for senior management, reducing manual reporting effort by ~25%
- ▶ Built automated Excel dashboards using Pivot Tables and VBA macros to consolidate operational KPIs across departments
- ▶ Validated and structured large operational datasets to ensure accuracy for business decision-making and audit readiness
- ▶ Collaborated with cross-functional teams to align reporting standards and resolve data quality discrepancies

Senior Executive – Revenue Cycle Management | [ACN Healthcare RCM Services](#)
Jun 2024 – Apr 2025

- ▶ Generated daily, weekly, and monthly MIS reports covering AR status, collections, and denial trends for finance and operations teams
- ▶ Automated recurring reporting workflows using Pivot Tables and VBA, reducing preparation time by approximately 30%
- ▶ Performed data validation and reconciliation across billing records, maintaining 98%+ accuracy standards
- ▶ Monitored KPIs including denial rates, collection efficiency, and AR aging to flag operational risks to management

Senior Associate – Revenue Cycle Management | [Ascent Business Solutions](#)
Mar 2023 – Jun 2024

- ▶ Supported MIS reporting, AR analysis, and operational documentation for RCM workflows
- ▶ Performed data preparation, quality checks, and reporting accuracy reviews for daily billing cycles
- ▶ Maintained structured process documentation to ensure audit-readiness and reporting consistency

ACADEMIC & TECHNICAL PROJECTS

CMS National Hospital Performance Audit — [Python](#) · [Pandas](#) · [Matplotlib](#) · [Seaborn](#)

Healthcare analytics — data cleaning, EDA, and visualisation using Python and Pandas on real CMS dataset to identify performance outliers across hospital categories.

Customer Churn Analysis — [Python](#) · [Scikit-learn](#) · [Power BI](#)

Built a predictive churn model for a telecom dataset, identifying top churn drivers and achieving 82% model accuracy using logistic regression.

Sales Analytics Dashboard — [Power BI](#) · [SQL](#) · [DAX](#)

Designed an interactive Power BI dashboard with SQL data source for regional sales KPIs, trend analysis, and executive-level reporting.

Agriculture Crop Yield Prediction — [Python](#) · [Flask](#) · [ML](#) · [NumPy](#)

Trained and deployed a machine learning model using environmental features; deployed via Flask API for web-based prediction.

ACTIVITIES & DEVELOPMENT

- ▶ SRH University: Data Science Club, AI Research Group, Business Analytics Projects, International Student Community
- ▶ Currently building SQL skills via Mode Analytics; targeting Google Data Analytics Certificate (Q3 2026)
- ▶ Actively improving German language from A2 toward B1 through structured coursework
